Eliahu Cohen

Product Manager | Discovery to Delivery | Builder PM

SUMMARY

A product manager who owns features end to end, from ideation and requirements through development, launch, and iteration. Five years owning product at a US tech startup, with a habit of building and testing prototypes before committing to scale. I make data driven decisions, partner closely with data, engineering, and design, and translate technical detail into clear product value. I am also an early adopter of AI and ship AI driven products in production. A trained architect and full stack developer, I design intuitive flows and build working prototypes myself.

EXPERIENCE

R&D Product Architect (Product Manager) | Veev, by Lennar
2021 to Present (5 years) • Tel Aviv, Israel • US ConTech startup

- Owned product end to end, from ideation and requirements through development, launch, and iteration.
- Shipped AI driven features that automated construction work, including an LLM quality control tool that raised first pass approval and cut rework.
- Prototyped a tool for Lennar estimators that brought key measurement data into one visual platform, making cost estimation faster and clearer.
- Partnered with real estate teams, translating feedback and market data into product requirements and features.
- Worked daily with data and software teams, and with internal customers, translating technical detail into clear product value.
- Built platform level tools across the business, such as searchable engineering specs with an AI chat and a fastener picker connected to our BOM and inventory systems.
- A trained architect and full stack developer, I design intuitive flows and build working prototypes myself.

EARLIER CAREER (ARCHITECTURE)

Architect and Creative Director | HQ Architects
2019 to 2021 (2 years) • Tel Aviv, Israel

- Coordinated national and international project submissions, including award winning work with Skidmore, Owings & Merrill (SOM) and ARUP.
- Designed and built the studio website end to end, owning the firm digital presence.

Junior Architect | Arquitetura Nacional and Onix Architecten
2015 to 2018 (3.5 years) • Brazil and Netherlands

- Delivered projects from concept to execution, producing construction documents, BIM models, and technical detailing.

EDUCATION

Full Stack Development, Computer Software Engineering Israel Tech Challenge (ITC), 2022 to 2023

Bachelor of Architecture (BArch) Pontificia Universidade Catolica do Rio Grande do Sul, 2012 to 2017

Urban Planning, Design and Society University of Groningen, 2014 to 2015

Creativity and Innovation VU Amsterdam, 2016
